Geology: Rocks, Minerals, and Crystals, oh my!

Girl Scouts, dive deep into the world of geology! We'll experiment with sifting, record the characteristics of the rocks we find, learn how to classify them, break open geodes to find nature's hidden surprise inside, and make a craft with our finds to take home. Younger troops will create a mosaic picture with air-dry clay and crystals, and older troops will assemble their rocks into wire-wrapped jewelry.

Levels: All Levels

Cost: \$10

Facilitator: Cassandra "Strings" Jillson

Recognition: Patch

The Amazing Properties of Paper

Girl Scouts, explore the properties of paper as you bend, fold, cut, and glue in new ways! We'll make paper pinwheels, airplanes, and a flipbook. Younger troops will also try a simple origami project and experiment with whirlybirds. Older troops will challenge themselves to bust paper-related myths and build a paper roller coaster.

Levels: All Levels

Cost: \$10

Facilitator: Cassandra "Strings" Jillson

Space Science: Constellations in the Station

Girl Scouts, explore outer space! Learn about the planets, the moon, and the stars through a series of activities. Make moon sand to learn about craters, deconstruct Oreos to learn about the phases of the moon, assemble a constellation projector to learn about the stars, test straw rockets to learn about the need for revision in the scientific process, and make air dry clay beads to learn about the planets.

Levels: Daisy, Brownie, Junior

Cost: \$10

Facilitator: Cassandra “Strings” Jillson
